Abstract

The hard and soft aspects of the field of digital imaging have been developing remarkably in these days. The field has consolidated figurative imagery from concepts that only existed in futuristic theory as it appeals to various systems of expression and communication. In addition the software industry and information services in Far East Asia leaders, Japan and South Korea, have been rapidly concentrating on this field. Therefore, the foundation to develop these following fields is needed: extensive education which nourishes researchers, government corporations, the academy, and industry, by organizing a system of applied research for related industries such as Contents Production.

1 Introduction

Asia Digital Art and Design Association was established in 2002. The field has consolidated figurative imagery from concepts, that only existed in futuristic theories, as they appeal to various systems of expression and communication. In addition, there are also the software industry and information services as you may see from the contents of the 'International journal of Asia digital art and design', a periodical publication, The aim of this association is to establish a theoretical method of media art design that is created by the rich harmony of art sense and human logical thinking based on media technology. Further, it aims to use our distinctive ethnic and cultural identities to explore common problems as we contribute to developing academic research and industry in Asia.

2 Alliance membership

This is named Asia Digital Arts and Design Association International Alliance member. This alliance is constituted from each represented association of Asian countries. and act for the purpose of ADADA.

3   Personal members

Individuals who support this alliance's purpose and organization. You may choose an organization of an alliance member to be an ADADA member. The society willingly invites all the people who are interested in digital art and design fields. Members of ADADA can obtain innovative findings and ideas related to digital art and design through the discussion of experts from multiple specialties.
